

" Superior Bristol Products for Airframe and Engine Assembly "

Bristol Industries Inc., established in 1978, is recognized worldwide as a superior manufacturer of specialized aircraft fasteners for airframe and engine applications.

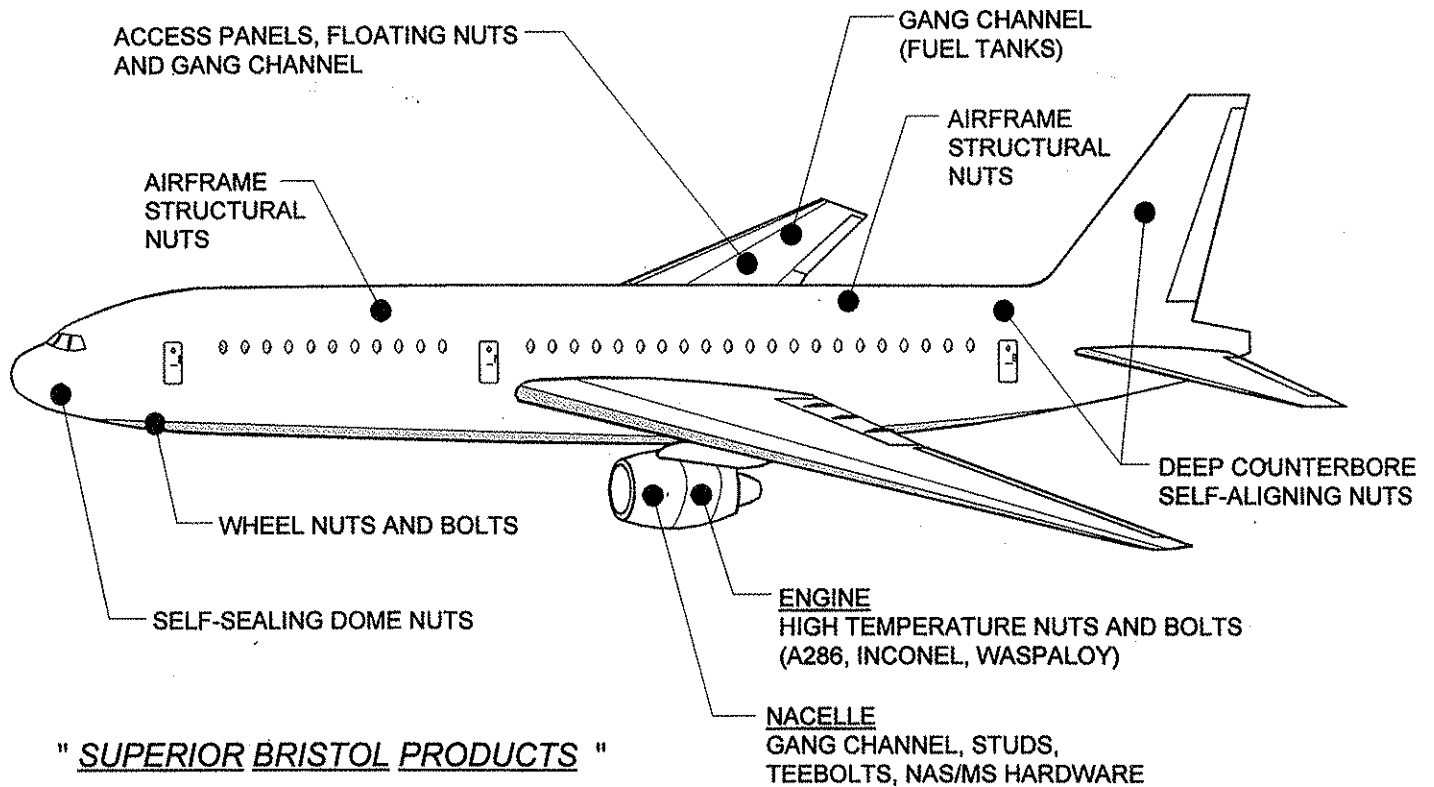

As a highly qualified supplier, Bristol fastener products are ISO9001 registered, AS9000 compliant and NADCAP approved. SPC controls are applied throughout all manufacturing processes.

Specialized fastener products include hex nuts, double hex nuts, high temperature nuts and bolts, floating anchor nuts and gang channel. Products are available in a wide variety of advanced aerospace materials.

Bristol also offers a complete line of precision installation tools. The tools are designed to enhance productivity. Products range from lightweight, single shot tools to automated assemblies.

Bristol is located in Brea, California, U.S.A.. The city of Brea is approximately 32 miles from downtown Los Angeles. With over 180,000 square feet of manufacturing area, Bristol can meet all fastening requirements.

AIRFRAME STRUCTURAL NUTS ENGINE NUTS AND BOLTS GANG CHANNEL

As an industry leader, Bristol quality products have been utilized worldwide since 1978 by major aerospace companies.

- ✈ Supplier to Aerospatiale, Allied Signal, Boeing, British Aerospace, Canadair, DASA, Embraer, General Electric, McDonnell Douglas, Northrop Grumman, Pratt & Whitney, Rolls Royce, Textron Aerostructures and other OEM's worldwide.

In pursuit of high quality standards, Bristol continues to strive for excellence in manufacturing and product performance.

- ✈ ISO9001 Registered
- ✈ ISO9001 Certification Number: #98-225
- ✈ AS9000 Compliant
- ✈ SPC Controlled Manufacturing Operations
- ✈ NADCAP Approved
